

Internet technologies course project

by Nadir Miralimov 324340413 and Adeem Wattad 205671902

Look in PDF file for diagramms.

Used technologies:

- \* PHP
- \* PostgreSQL
- \* JavaScript
- \* Webpack
- \* React
- \* AJAX
- \* Babel
- \* CSS
- \* HTML

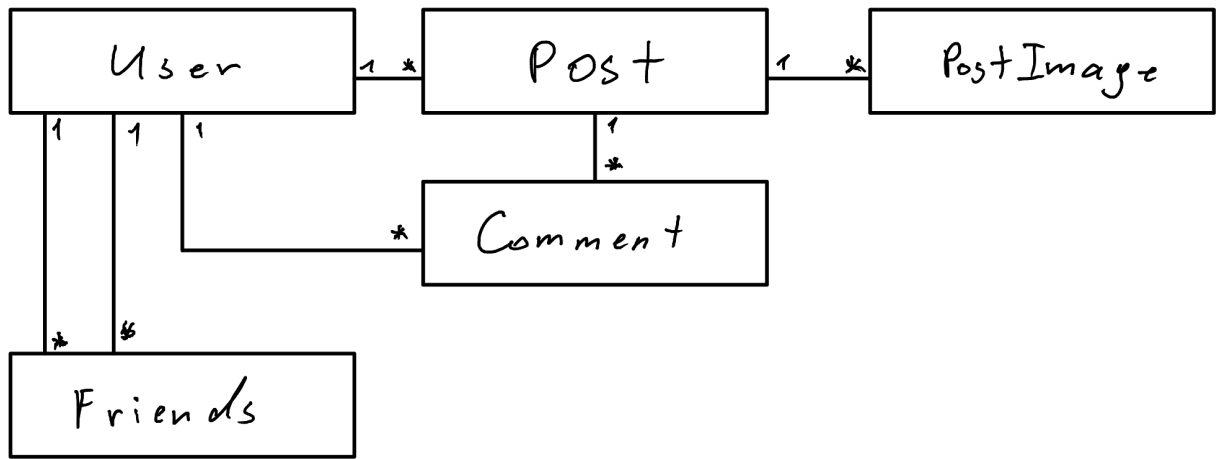

Additional features from FaceBook:

- \* Likes
- \* Profile picture

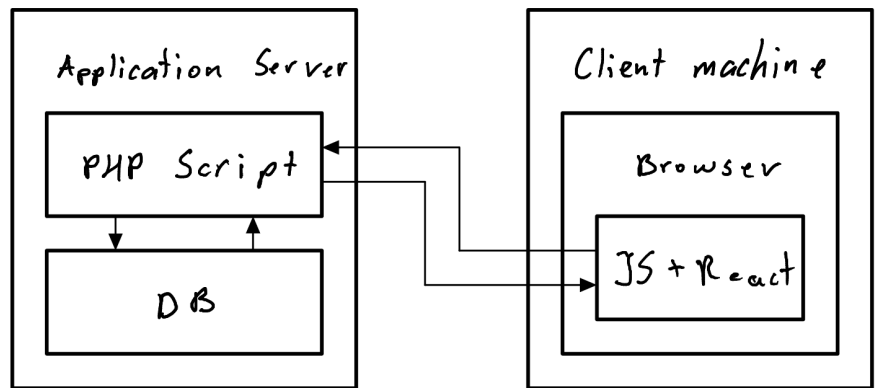

Known bugs:

- \* Same user can like post many times.
- \* When adding new friend, friends posts are not shown until refreshing the page.
- \* When post doesn't have a title, it doesn't display the link.

## Entities Model

## Application Structure:

## Subsystems
